Sherbert Sequence Solution analysis bartle sherbert. Introduction To Real Analysis Bartle Sherbert Bartle and Sherbert (b) Let $u := \sup S$ and $b < 0$. If $x \in S$, then (since $b < 0$) $bu \leq bx$ so that bu is a lower bound of bS . If $v \leq bx$ for all $x \in S$, then $x \leq v/b$ (since $b < 0$), so

Bartle And Sherbert Sequence Solution

2 Bartle and Sherbert Conversely, if x is in $(A \setminus B) \cup (A \setminus C)$, then $x \in A \setminus B$ or $x \in A \setminus C$. Thus $x \in A$ and either $x \notin B$ or $x \notin C$, which implies that $x \in A$ but $x \notin B \cap C$, so that $x \in A \setminus (B \cap C)$. Thus $(A \setminus B) \cup (A \setminus C) \subseteq A \setminus (B \cap C)$. Since the sets $A \setminus (B \cap C)$ and $(A \setminus B) \cup (A \setminus C)$ contain the same elements, they are equal. 5.
