25.1 Vibration of a Pendulum (page 491)

1. The time it takes for one back-and-forth motion of a pendulum is called the .
2. List the two things that determine the period of a pendulum.
3. Circle the letter of each statement about a pendulum that is true.
 - a. A longer pendulum has a longer period.
 - b.

motion about an equilibrium position is a vibration. A vibration cannot exist in one instant. It needs time to move back and forth. Strike a bell and the vibrations will continue for some time before they die down. A disturbance that is transmitted progressively from one place to the next with no actual transport of matter is
