The greatest challenge for the Circum-Baikal Railway was and still is frequent landslides and mud flows. Even at the time of surveying, engineers noted a strong weathering of the rock layers and a large amount of scree.The demolition of the hillside and the steep slopes during the construction of the trackbed provoked a catastrophic intensification of geodynamic processes.

## Circum-Baikal Railway - Wikipedia

Conveniently, one of the most intact gulags is in the Kodar Mountains east of Lake Baikal. Its name is Borskiy. Thousands of people mined uranium here for Stalin during the race to build the world's first atomic bomb. At an altitude of 2000m and ringed by 3000-metre peaks, it is Russia's most beautifully situated gulag.
