Radio Jove 5 12/22/2004 Jove Antenna
Manual RJ1.2 December 2004 1.
Introduction This manual describes an
improved version of the original Jove
antenna. The original antenna, called

the RJ1.1, was introduced in 1999. It was mounted 10 feet above ground and designed to observe when Jupiter was passing high in the sky, close to overhead.

Antenna Manual Complete - starlightcascade.ca

The Radio JOVE Project has set up this web site specifically for active participants who want to contribute to and use the project's data archive. Those just learning about the Radio JOVE Project may wish to consult our traditional site located at radiojove.gsfc.nasa.gov.

The Radio JOVE Data Site

A simple direct conversion receiver for 20 MHz, this receiver is part of the Radio JOVE radio telescope kit. It is designed to be easy to construct and align. Details are available in the construction manual. (Use the "Equipment Manuals" link on the left of this page.)

illustrations: NASA ('Radio JOVE RJ1.2 Antenna Kit Assembly Manual' 2012)

When can Jupiter be heard. The declination of Jupiter varies from 23.5 degrees south to 23.5 degrees north over a 12-year cycle, with one period of observers in the northern hemisphere having an advantage and the other period observers in the southern hemisphere.

Radio JOVE - Dwingeloo Radio Telescope | CAMRAS

WKU Radio Jove Remote Station Overview. In the basic Radio Jove setup, incoming radio waves close to the 20 MHz resonant frequency (15 meter wavelength) of two horizontal dipole antennas induce small (microvolt) electrical signals in the antenna wires that are transmitted down coaxial feed lines to a radio receiver, where they are amplified, mixed down to audio
