The Rover V8 engine might have started life in the USA, but thanks to some creative thinking at Rover, it became a British institution, powering some of the country's most iconic cars... The Rover V8 engine had a very interesting life. During the late 1950s, the US car industry turned to aluminium as a material to build their engines from.

Rover V8 engine - the whole story from 1963 to 1999

25 scores well on the eco front. With an average of 163 g/km CO2 across the range, its emissions are relatively low for a small family hatchback. Eco-conscious buyers should consider the 2.0-litre diesel, which is one of the greenest models in the range. The range is also fairly economical, averaging 44 mpg.
